PROFESSIONAL SUMMARY

Senior Android Engineer and Tech Lead with **11+ years of experience** designing, developing, and shipping production mobile applications using **Kotlin, Java, and Jetpack Compose**. Experienced in technical leadership, application architecture, feature ownership, mentoring, and cross-functional delivery across **banking, privacy/security, insurance, enterprise, and IoT products**.

Strong expertise in **Clean Architecture, MVVM, modularization, Coroutines, Flow, Jetpack Compose, automated testing, CI/CD, performance optimization, and cross-platform development with Flutter**. Experienced in delivering products at scale, including features for **MEGA, a privacy product serving 300M+ users**, banking payment platforms, and AI-enabled mobile applications.

CAREER HIGHLIGHTS

- Delivered features for **MEGA**, a privacy product serving **300M+ users**, improving Password Manager auto-fill performance by **33%** and reducing production bugs by **15%**.
- Recognized as **Top Engineer of the Month — February 2026** for technical contribution and delivery on a next-generation banking payments platform.
- Led the **FieldCatcher Android-to-Flutter migration**, coordinating engineers across locations and delivering the MVP on schedule.
- Trained and mentored **30+ developers** in Android development.
- Experience spanning **banking/payments, privacy/security, insurance, IoT/telematics, enterprise applications, Flutter, and on-device AI/ML**.

TECHNICAL SKILLS

Languages: Kotlin, Java, Dart

Android: Android SDK, Jetpack Compose, Material 3, Coroutines, Flow, ViewModel, Navigation, WorkManager, Room, DataStore, Paging 3

Architecture: Clean Architecture, MVVM, Multi-module Architecture, TDD

Libraries: Hilt, Dagger, Retrofit, OkHttp

Testing: JUnit, Mockito, MockK, Turbine, Espresso, Compose UI Testing, Appium

Cross-Platform: Flutter | Additional exposure: Kotlin Multiplatform (KMP)

Backend & Data: REST APIs, GraphQL, Firebase

Performance & Security: Baseline Profiles, Android Profiler, LeakCanary, ProGuard/R8, DexGuard, Certificate Pinning, OAuth2/JWT, Play Integrity API

CI/CD & Release: Gradle Kotlin DSL, GitLab CI/CD, Fastlane, Firebase App Distribution, Microsoft Azure

Observability: Firebase Analytics, Firebase Crashlytics, Splunk

AI / ML: TensorFlow, PyTorch, On-device Inference, Dialogflow

PROFESSIONAL EXPERIENCE

Synechron

Senior Software Engineer

Oct 2025 – Apr 2026

Bengaluru, India

- Core contributor to a next-generation retail banking Android application for a leading UAE retail bank, owning major functionality within the Payments module.
- Designed and delivered payment workflows covering fund transfers, bill payments, and beneficiary management, with a focus on reliability, security, and maintainability.
- Contributed to technical design, implementation, defect resolution, and release readiness across the payments workstream.
- Increased automated unit-test coverage across payment workflows, reducing regression risk and improving release confidence.
- Developed automation scripts to streamline testing workflows and reduce manual QA effort across release cycles.

- Collaborated with developers, QA, product stakeholders, and business teams throughout the development lifecycle, including business demonstrations and stakeholder feedback.
- Used GitHub Copilot and Claude Code for development, code reviews, and test-generation workflows.

MEGA (MEGA Privacy)

Jan 2023 – May 2025

Senior Android Engineer

Remote

- Owned the technical architecture, implementation, and release of Search and TOTP authentication functionality for the MEGA Password Manager.
- Delivered features end-to-end across MEGA Cloud and Password Manager, including implementation, release management, performance analysis, and quality improvements.
- Improved Password Manager auto-fill performance by 33%, enhancing speed and responsiveness during password entry.
- Migrated legacy Android XML-based UI to Jetpack Compose using Kotlin, modernizing the application UI and improving rendering performance.
- Reduced production bug count by 15% through stronger automated testing, debugging, and code-review practices.
- Collaborated with cross-functional engineering teams to integrate features and optimize application performance.
- Used GitHub Copilot to accelerate feature development and improve day-to-day engineering productivity.

Tata Consultancy Services

Oct 2014 – Jan 2023

Kochi, India / Cologne, Germany

IT Analyst — Kochi, Kerala

Aug 2022 – Jan 2023

- Collaborated with product teams to define requirements and deliver new features for the FieldCatcher Flutter application.
- Monitored production application behavior, diagnosed issues, and delivered fixes to improve application stability.
- Increased unit-test coverage to 80%, improving reliability and reducing production bugs by 20% through proactive testing and debugging.
- Upgraded the application to Flutter 3.0, improving performance and adopting newer framework capabilities.
- Reduced application loading time by 25% through image-size optimization.
- Integrated PyTorch AI models to deliver intelligent functionality within the mobile application.

IT Analyst — Cologne, Germany

Aug 2019 – Jul 2022

- Led a team of engineers delivering the FieldCatcher Android application for a digital farming portfolio, coordinating development and delivery across locations.
- Led the migration from Android to Flutter, helping the team adopt the framework and delivering the MVP on schedule.
- Integrated TensorFlow AI models and developed custom Flutter plugins to enable on-device AI capabilities.
- Established GitLab and Fastlane CI/CD pipelines, accelerating release cycles and reducing manual deployment effort.
- Implemented automated data synchronization using GraphQL.
- Improved application reliability through comprehensive unit and UI testing.

Systems Engineer — Kochi, Kerala

Oct 2014 – Aug 2019

- Developed Android applications across insurance, IoT/telematics, enterprise, and hospitality domains, including for a leading US insurance provider and a UK postal-service client.
- Built and deployed a Dialogflow chatbot for a hotel-booking solution.
- Managed build and release automation and established Microsoft Azure CI/CD pipelines; trained and mentored 30+ developers in Android development.

EDUCATION

B.Tech — Electronics & Communication Engineering

May 2014

Government College of Engineering, Kannur
